All fields on the hover to have a comment section with info

Pictures may have standard display sizes as well as untimate resolution pictures. It seems obvious that many times different angles may add needed information.

The idea of the thumbnails is to allow the user to browse to find the picture he desires. In addition there is a search on the bottom of the screen for the user to find items using the label (id text).

There should be a "log in" for comments and such. There will need to be "register" section as well. There may be a place to request uploading permission.

Uploads should be restricted to selected people. Registration identify that possibility.

The registration system should use anti-spam techniques.

Contact includes webmaster, content master, registration master.
